

Dr Joel Fiddes

Geoscientist

✉ joelfiddes@gmail.com | 🌐 Website | in LinkedIn | 📄 Google Scholar | 🐙 Github

Currently

I am a geoscientist with over 15 years of interdisciplinary experience working across research institutions, international organisations and multilateral donor projects. My main interest is on high mountain processes related to natural hazards, water resources and resulting impacts upon communities. I use and develop geoscientific models and other datascience tools in combination with field campaigns to understand these processes and improve mapping and forecasting methods. I am currently working at the WSL Institute for Snow and Avalanche Research, based in Davos, Switzerland.

Education

- 2009-13 **University of Zurich** PhD Geoscience. Thesis: Subgrid Simulation of Land Surface Variables in Heterogeneous and Remote Environments: Application to Mountain Permafrost. ETH library.
- 2006-07 **University of Edinburgh** MSc Environment & development. Thesis: Impact of climate change on snow-based water resources in Afghanistan.
- 2001-04 **University of Aberdeen** BSc Tropical Environmental Science. Thesis: Sustainability of subsistence hunting on Neotropical mammal species in North-East Peruvian Amazon.

Employment & Projects

- 2018-24 **WSL Institute for Snow and Avalanche Research SLF** *Research scientist*. Investigating snow processes in High Asia using models, EO data and field measurements under SNF project "From Cloud to Ground: Snow Accumulation in Extreme Environments". SDC funded projects in Central Asia CROMO-ADAPT (2021-2025) and WWCS together with CARITAS CH (2020-2024). Both projects focus on mountain related water and hazards nexus and collaborate with an extensive network of regional partners.
- 2020-2022 **Permian Global** *Consultant*. Supporting carbon prospecting projects through remote sensing analysis, code routines for carbon models. Tools for automated retrieval and analysis of remote sensing datasets to estimate deforestation rates.
- 2018-20 **Landell Mills Ltd** *Consultant* Zarafshan River Basin Programme, EU TA project with Ministry of Energy and Water Resources, Tajikistan. Develop pilot routines for monitoring and modelling snow based water resources.
- 2017-18 **University of Oslo** *Scientist* Swiss National Science Foundation research scholar. Developing data assimilation and uncertainty framework for large area snowpack simulations in mountain regions.
- 2017-18 **World Meteorological Organisation** *Consultant* for the WMO programme Global Cryosphere Watch. Developing a global solution for interoperability of CryoNet monitoring stations and GCW dataportal.
- 2014-17 **WSL Institute for Snow and Avalanche Research SLF** *Data scientist*. Developing and managing data systems for the SwissEx/ OSPER project a large interdisciplinary environmental data acquisition and management project with multiple ETH domain partners. The WSL/ SLF is a leading federal institute in Switzerland for both hydrology and natural hazard assessments.
- 2016 **Himalaya Permafrost ETH SEED** *Scientist* Establishment of high altitude permafrost monitoring sites Langtang, Nepal. Training young Nepalese scientists. International permafrost and data tools workshop with participants from Afghanistan, India and Nepal.
- 2014 **University of Zurich** *Scientist*. Managing PERMOS network of ground and rock temperature measurements at Jungfrauoch, Schilthorn, Piz Corvatsch. Including extensive fieldwork and rope-access work. Processing GST, meteorological station and borehole data (www.permos.ch).
- 2014 **University of Zurich** *Scientist*. Swiss Development Cooperation/DEZA funded climate change adaptation programme (www.ihcap.in). Developing baseline maps for key land surface variables in the Indian Himalaya with direct coordination with several Indian Government agencies (lead Department of Science & Technology).
- 2012 **Afghanistan Research Evaluation Unit** *Consultant*. Remote sensing analysis of water availability in irrigated zones in Sar-i-Pul River Basin.
- 2011 **GIZ/ Hydroc** *Consultant*. Disaster risk management project in Badakhshan, Afghanistan for GIZ. Component avalanche hazard risk zones.
- 2011 **Afghanistan Research Evaluation Unit** *Consultant*. Remote sensing analysis of water

availability in irrigated zones in Panj Amu River Basin.

- 2010-11 **Landell Mills Ltd. Consultant.** As part of Panj-Amu River Basin Programme (P-ARBP) in north-east Afghanistan developed a strategy together with a range of tools to improve water resource management. Training the first government team in snow sampling techniques (training course Wakhan Corridor). Establishment of high altitude field sites.
- 2009 **Agha Khan Foundation Consultant.** Project "PMIS": Remote sensing analysis of irrigated zones in Baghlan NE Afghanistan. GIS & Remote Sensing – Applications in Social Water Management. ->
- 2009-13 **University of Zurich Scientific researcher/ PhD Candidate.** National science foundation funded research undertaken to develop and test tools that enable efficient application of numerical models driven by climate datasets in complex terrain. Work resulted in three first author publications. Oral and poster presentations at several international conferences. Supervision of Msc and BSc. students. Fieldwork in high mountain environments. Large-scale deployment of temperature sensors.
- 2009 **Agha Khan Foundation Consultant.** Training in GIS systems and geospatial survey for AKF project engineers in Puli Khumri NE Afghanistan.
- 2007-17 **Independent Consultant** Projects mainly in field of water resources include: Environmental change analysis, capacity building, surveying / mapping, technical training. Clients include: multinational/ national donors, development consultancies, NGOs, e.g. European Commission, Landell Mills Ltd. Agha Khan Foundation, GIZ, Concern Worldwide.
- 2008 **Welt Hunger Hilfe Consultant.** Upper catchment protection project "PEEP": training in geospatial survey and GIS systems for PEEP project staff.
- 2008 **Concern Worldwide/ Welt Hunger Hilfe Consultant.** Social water management and upper catchment protection projects "SWIM/SMILE": Established GIS systems and conducted training in geospatial surveys for project staff. Surveying of irrigation channels and infrastructure.
- 2008 **Concern Worldwide Consultant.** Market analysis for natural resource based products in Takhar NE Afghanistan.
- 2007 **Landell Mills Ltd. Consultant.** Environmental screening report for irrigation rehabilitation component of Kunduz River Basin Programme. Additionally provided concept note on methods in snow and ice monitoring.
- 2007 **Mercy Corps Researcher.** Author of a policy document for global humanitarian agency Mercy Corps. Construction and analysis of a 30 year satellite data record to assess possible changes in snowcover area (SCA) over this period and implications for water resources of Northern Afghanistan. Collaboration with the Landell Mills led European Commission Kunduz River Basin Programme.
- 1999-04 **Formative research expeditions** Gulf apex predator prey project (*University Alaska Fairbanks, Alaska, 2004*). Subsistence hunting study (*University of Aberdeen/ Royal Geographical Society, Peruvian Amazon, 2003*), Coral reef biodiversity monitoring (*Greenforce/ University of Malaysia, Borneo, 2001*), Tian Shan biodiversity study (*BSES/CEH, Kyrgyzstan, 1999*).

Core competences

- Technical** Land-surface modelling and model development with focus on mountain environments.
- Environmental analysis using climate data and other large datasets.
- Remote sensing services, analysis of environmental change, snow cover, drought conditions, cropping patterns etc.
- Proposal writing and Project management.
- Field** Establishment of field monitoring tools, deployment of sensors/ stations.
- Scientific expedition planning and leading.
- Impact of climate change in mountain regions and implications for development activities/ communities.
- Training** Development of project specific modelling tools.
- Workshops and lectures.
- Field training in glacio-hydrological methods.

Technical skills

Geospatial analysis

Numerical models
 Remote sensing / image processing
 Statistical analysis
 Large data processing
 SQL / Postgres
 Database management
 Server admin
 Cluster/HPC computing
 Linux
 R
 Python
 AWK
 Bash
 LaTeX
